

Check Video on Conjunctions of D1 - Vimshottari Dasha. Based on that, decide the planet if conjoined / in parivartana. This is the *Dasa Lord* from now on.

### Exceptions:

- Nodes:** In case of nodes (Rahu/Ketu) in the above parivartana or conjunction - many times the exchange is happening only when the planet(s) is exalted / debilitated. Otherwise, Nodes are giving their results and also the lord of the Rasi in which they are placed in D1.
- Degrees:** If there are planets on same degree (<1 degree difference) as lagna degree in any Rasi - they do not exchange results with any planet.
- If planets are on same nakshatra & pada - most likely results will be interchanged
- Results are interchanged, if planets are exalted / debilitated / own sign etc.
